VOLUME XIII. No. 8

EMPRESS, ALTA. THURSDAY, July 23, 1925

Price: \$2.00 Per Year.

Anglican Church

Services on July 26th (7th Sunday after Trinity):
J. Howley, Farm;
11 a.m. Holy Communion.
3 p.m. Evening Prayer.
St. Mary's Church:
7:30 p.m. Evening Prayer.
L. J. Tatham,
Priest-in-charge.

R.M. of Mantario

Minutes of meeting Met. July 14th, 1925. At Trossley school. Present, Reeve Rivers and a full council. Minutes of previous meeting read and confirmed. Committee:
A. Reeve Rivers and account of S. Smith, reported that the matter was now settled.
R. Batty re river to pound No. 3, reported that he had purchased the horse for \$25, but considered it too good to shoot. The pound fee was \$4.85, the horse was now being worked and he suggested should be given to the first corner for what was against it.

C. Edwards re trail on Bait-waiter quarter. Reported that he had seen Mrs. Nichol and was unable to come to any arrangement.
Batty—That Councillor Austrom be the representative of R. M. 563 on the Estonia Union Hospital Board.
Austrom—That a cheque for \$50 be forwarded to the Estonia Agricultural Society.

Walker—That a grant of \$50 be given to the Mantario Rural Educational Association for the School Fair to be held at Mantario School, and a cheque for that amount forwarded when required. The Association to be notified that next year, in order to encourage the children to take a pride in good livestock and interest them in mixed farming, the council will offer, in addition to the usual grant of \$50, a further sum of \$50 to be donated in prizes for exhibits at livestock shows. To the School District showing the best exhibit of: A. Cattle; B. Calves (half breed); C. Calves (heifer type); D. Hogs (bacon type). The appointment of \$50 in special prizes to be left to the discretion of the Educational Society.
The conditions to be that all animals must have been born on or after the 1st day of March in the year in which they are exhibited. Judging to be on points; 60 p.p. for the individual animal and 40 p.p. for the handling. The suggestion to be made to the Association that

Mayfield United Church

Regular services will begin at Trossley schoolhouse at 11 a.m., followed by Sunday School at 12 noon. At Mayfield, Sunday School at 2 p.m., and church service at 3 p.m. Sermon topics—Trossley, "The Mind of Christ"; Mayfield, "The Second Mile." Let us use God's day for his worship and the study of his word.
P. A. C. D.

Mayfield Sunday School is holding its first annual picnic next Tuesday, July 28. The picnic grounds are in the ravine, 1 mile west of the Estonia road, directly west of Mayfield schoolhouse. Sports of all kinds, including lawn tennis, croquet, and other games, will be on the programme for the youngsters. No admission fee, no collection. Be prepared for a good afternoon and evening.

They got in touch with the Bankers' Association, Winnipeg, and with the Extension Department of the Saskatchewan University, Saskatoon.

The Reeve and Weed Inspector or Wright, reported on the Weed conferences at Swift Current and Roseau. Weed Inspector Smithman was also present for instructions in regard to French Weed which was growing in several places in his district. The delegates impressed upon the council the advisability of taking steps to control both Perennial Sow Thistle and Canada thistle, now found in small patches while it was possible to deal with them, instead of allowing it to spread over the Municipality, when it would be impossible to deal with it.

Austrom—That \$1 be paid for each new patch of Canada Thistle or Sow Thistle reported. A specimen of the weed and the location where it was found to be produced for inspection to the Councillors, Reeve, Weed Inspectors or the Sect-Treas.

Walker—That the cost of Destruction of Weeds in regard to Canada Thistle or Sow Thistle and the expenses of Weed inspection be charged to general account. That any other weed work dealt with be financed by reducing the appropriation of the Division in which the work was done by an equivalent amount.

Batty—That fourteen 12 in Culverts, 24 ft. long be ordered from the Co. da Ingot Iron Co., Winnipeg.

Austrom—That in future all Culverts supplied on Govt. grant work be charged to General Roads Account.

Amendment by Batty—That the words "on Govt. Grant work" be deleted. After some discussion the amendment was withdrawn by Coun. Batty and was again put by Coun. Walker.

Amendment—Ayres 4, Nays 3, carried.
The motion was then amended (cont. on back page).

Exciting Game Witnessed In Final of Ball Tournament

Estonia Nose Out Local Team to Win First Money. With Two Men on Bases and None Gone, Empress Fall To Record Tie Run in Final Tuning

Though accorded a somewhat smaller patronage than usual the ball tournament held here yesterday was an entire success from every other point of view. With five teams entered the whole afternoon and evening were full, the final game being called at the end of the seventh on account of darkness. The tournament was slow in getting under way, some players from every team being late and it was two o'clock when the umpires sent Bindloss and Empress away. After an interesting seven innings the home team were returned winners by 9-4. In the opening frame they jumped on Barre hard and free hitting combined with bobbles gave them a seven-run lead to start the second. Thereafter the result was never in doubt, Benson breezing along in great style. The only hitters who gave him trouble were Venance and Leithorn, who battled consistently throughout. His support was first-class and he always had something extra to put on the ball in a pinch. The entire local line-up hit well.

In the second game Estonia had no difficulty with their old rivals from Lovena, winning under wraps by 7-0. Lovena never got going and apparently could do nothing rightly while the winners were sound throughout. Martin, who is one of the best hitters to show his

stuff in these parts this year, worked easily and effectively with a curve ball whilst pretty to watch. Immediately following this encounter Estonia and Leader went five innings to a 10-4 decision, the game being called by popular request. The youthful Leader aggregation were no match for their older and more experienced opponents, though they never quit trying. With a few more years' experience they will be a tough nut for any team.

The final brought together Estonia and Empress in much the closest and hardest-fought game of the day, the visitors getting the decision by 5-4 after seven hectic innings. The locals retired the visitors in order in the first half of the first and then helped themselves to two runners, which looked as big as a house. In the second, however, the opposition fell on Northcott's offerings with a vengeance, tallying four times on solid hits. Benson was rushed to the rescue and thereafter the visitors got only one run, on a single, an error, and a passed ball. From then on the battle to make up the deficit was fought bitterly. One run was pushed around in the fourth and another in the sixth. It remained for the last half of the last to supply the big thrill. The first two men up got on, the next one went by the foul

Relic of Quebec's Fall to Return to Canada

According to press despatches from London, Lord Willington, 1st Viscount Rutton, who was scheduled to sail from Liverpool on April 9th by Canadian Pacific steamship "Montreal" as special emissary from the Hastings Corporation to the Quebec City Council, has postponed his visit to the city owing to the outbreak of the influenza epidemic. His Lordship's official mission, which will be carried out when the Viscount returns, will be to return to the City of Quebec the shield which was taken from its gates when it was captured by General Wolfe in 1760 and was presented to the Hastings Corporation by General Murray who was present on that memorable occasion. Since that time the shield has hung over the door of the Council Chamber in the Town Hall at Hastings and Quebec has endeavored to obtain its return, for years in vain, but at last Hastings has relented. Viscount Willington will be accompanied by his wife who before her marriage was the Hon. Marie Adelaide, daughter of 1st Baron Brassey, together with his son the Hon. Inigo Brassey Freeman-Thomas and his wife.

C.G.I.T. Camp

Near to J. Dargies' farm

On Monday, at 10 a.m. sharp (weather permitting), camp will be struck for the 1925 season of local C.G.I.T., the parking place being those of Mayfield and Empress senior. Because this is the largest group of girls to camp locally and because the girls are all true sports and enthusiasts, we think it fair to predict an interesting time. Both girls and leaders are anxious that the camp be first and foremost characterized by efficiency, and each day will be filled with sport, gymnastics, work, talks, round table conversations, and numerous unexpected diversions, all of which have their own appointed hour, and which will occupy the entire camp. For this reason it has been decided that only certain hours may be devoted to the reception of visitors, and one of these periods will be set apart, to be held on Friday evening, July 31st, at 7 p.m. Aside from this, on Wednesday evening from 7 to 9, relatives and friends will be warmly welcomed to inspect the camp and visit with the campers. For the stunt programme, which will be an entire surprise, a small charge will be made.

First, and the second out put the runners on second and third. With the sly and winning runs waiting, Martin rallied his powers and struck out the third man, winning most worthily in the more than twelfth.

The features of the day were the pitching of Martin, who went nineteen innings to win the first prize, a shoe-string catch by Holmes of Lovena, in the second game and the excellent umpiring. Ralph E. Arthur and William Scott, alternated throughout, making the best duo who have called them on the home diamond for many moons. The proof of their good work is that though the entire day there were none of the squabbles which mar so many tournaments. All in all the day reflects credit on those who made it possible and one of the best met by the guarantors, who undertook the entire with no dry dreams of financial success.

For Good Housemaking

you should be sure that all your building materials come from us. If you use our lumber and supplies your work will last longer, look better, cost no more.
OUR LUMBER is always well seasoned, the grain is straight, and the wood clear. There is never waste, but immense savings, if you purchase here,

—To Mr. and Mrs. J. World, July 21, a daughter.

Stock on Townsite a Nuisance

During the past week stray animals on the townsite have become a nuisance in destroying gardens and disturbing people's rest. Just why this should be allowed to repeat itself each year is hard to understand—trees and other plant life which are many of us take pleasure in, being more or less injured by the carelessness of a few.

The rivers are now lower than any other previous time this year.

The boys who were camping at Coates' Lake, arrived home today.

During the past week, there have been storms in our neighborhood, but none in town.

Ball teams from Alsask and Seepire, were expected here on Wednesday, but failed to attend.

Saskatchewan Pool Handles Fifty Million Bushels Wheat To Apl. 30

Regina. — Approximately 50,000,000 bushels of wheat have been delivered to the Saskatchewan wheat pool up to April 20, or practically half the total deliveries made from Saskatchewan up to that date, according to a report by the secretary, contained in the annual report of the marketing and co-operation branch of the provincial department of agriculture.

"The pool began to accept delivery of grain September 15, 1924, the first total payment being on the basis of \$1 a bushel for No. 1 Northern in store at Port William," says the report. "An interim payment of 25 cents a bushel was declared in March, making a total of \$1.25 a bushel on No. 1 Northern." The final distribution will be made in July."

Big Dominion Day Celebration In London

Music Was Furnished Entirely By Canadian Artists

London.—More than 1,000 people attended the Dominion Day reception at the new Canadian building, July 1. An unusual feature was a musical programme, entirely by Canadian artists. Hon. G. H. Ferguson, premier of Ontario, spoke of his recent visit during his present visit of considerable misconception among public men in England of Canada's attitude towards the British Empire. It has been suggested that Canada eventually will become a nation within itself. In Canada, when he is talking a similar talk, he is called a "little Canada." Premier Ferguson pointed out that he could see no other solution for the present commercial depression that he made ourselves self-sustaining as an empire.

Estimating Wheat Crop

Yield Of 350,000,000 Or More Is Now Expected
Ottawa.—A wheat yield of 350,000,000 bushels for Canada in 1925 is estimated by the Dominion bureau of statistics in a crop report issued recently. The figure is based upon the average of last year and according to reports received by the bureau the total now in the field is approximately the same as last. A yield of 350,000,000 bushels would be ten million bushels above the average of the past five years.

"Splendid rains have fallen this year, during the critical period of growth and should favorably condition the yield may well be considerably larger than that indicated."

Mrs. M. J. Burd Dead
Montreal.—Mrs. M. J. Burd, of Vancouver, British Columbia, died at her home at 1114 Avenue of the Americas, Montreal, July 1, at the age of 74. She was a native of the British Columbia, and had been residing here for several years.

France Signs Protocol
Geneva.—A League of Nations official communiqué announces that Paul Boncour, French chief delegate to the recent armistice conference at Geneva, has signed for France the conference's protocol against the use of poison gas and bacteria in warfare.

And To Building
Saskatoon, Sask.—Owing to the increasing demand for package rolled oats the Quaker Oats Co. has found it necessary to add a fourth story to the package building at its mill here, and the addition is now under construction.

Two Important Tasks Confront United Church Says New Moderator

Toronto.—There were two great tasks before the United Church of Canada, one missionary and the other spiritual, stated Dr. George C. Pligdon, moderator of the general council of the United Church.

Dr. Pligdon says in his message: "The United Church of Canada is one, and as a unit, we go forward to our great undertaking in the spirit and power of our accredited Lord." "Two great tasks confront the United Church. The first is spiritual. The wider relationship into which we have entered has meant a rich experience to all; we need now to give this ex-

perience a new expression, and all over the land, arrangements must be made for the adequate expression of this richer spiritual movement.

"The second task that confronts us is missionary. We are the United Church of Canada; we must, therefore, see that the entire religious need of the nation is met. Moreover, some of the greatest foreign mission fields in the world are under our care, and almost their entire working force has been sent from the United Church. These heroic ambassadors of the Cross must receive full support, and ample funds provided for a new missionary advance-

Says Japan Has No Desire To Go To War

Chicago.—Trouble between Japan and Russia is inevitable, unless the Soviet Government ceased its tactics of spreading "Red" propaganda, said Count Michimasa Koyama, member of the Japanese House of Peers, who was interviewed here. "Japan has no ambitions, calling for aggressiveness against any nation," he said, "because she is still hurt over the action of the United States in excluding her nationals. Japan has no desire to go to war."

C.W.N.A. Convention

Most Successful Gathering of Weekly Newspaper Men at Winnipeg
Conceded to be the most successful gathering yet held, the Canadian Weekly Newspaper Association assembled at the Royal Alexandra Hotel in Winnipeg for their 25th annual convention on June 24, 25 and 26. Some 400 delegates were in attendance from all over Canada. On the opening day the members were welcomed to the city of Winnipeg by Mayor Webb. The business sessions occupied the better part of three days, and the addresses and discussions were found to be most helpful.

The London Daily Telegraph says: "The Dominion of Canada at last has secured a home in London worthy of its past, present and future. The remodeling of the building for its use has improved the amenities of Trafalgar Square, for the people of London and, indeed, the whole Empire, owe a debt of gratitude to the Canadian people."

The Manchester Guardian, noting the tendency of the dominions to plant their offices as near as possible to the heart of London, says Canada certainly has secured a home the closest of all to the heart of the metropolis; her admirable building is right in the hub of the British world, where everyone who comes to London will see it, for it is as inescapable as Nelson's monument."

Heart Disease More Deadly Than Cancer

Terrific Pace Impeding By Rapid Way Of Modern Living

Portland, Ore.—Great strides in medical efforts to lengthen the average span of human life cannot be made until heart disease, now more deadly than cancer, tuberculosis and plague, is controlled, physicians here, attending the opening of the 1925 session of the Pacific Northwest Medical Association, declared today.

The human heart must physically be a heart of steel to withstand the terrific pace imposed by the rapid pace of modern living, declared two of the leading medical men of the world, both of whom devoted their lectures to discussions of the heart.

Canada's Sea Harvest Increases

Ottawa.—Canada's sea harvest increases in value. In May, 1925, \$7,244,000 pounds of sea fish were landed on both coasts and the value of the catch, \$12,522,165, is nearly a million dollars higher than in May, 1924. On the Pacific coast, 1,883,610 pounds of salmon were taken, compared with 927,600 pounds in May, 1924.

Germany Imposing Wheat Tax

Comes Into Effect August 1 and Cargoes Are Being Rushed
Montreal.—A shipping rate unique in the history of Montreal will be in force this month as a result of the wheat tax imposed on foreign wheat entering Germany by the government of that country. The tax will come into effect on August 1, and already grain steamers are leaving European and other ports for the port of Hamburg to get their cargoes back to Germany by the end of the month, and thus escape the tax.

French Losses In Morocco

Paris.—The French senate has unanimously voted confidence in the treaty in Morocco.

Britain Keeps Watch On Propaganda Of Soviets In China

London.—The talk by Teller, the Russian foreign minister, of war between Great Britain and Russia, if British and Russian relations are to be the Soviet propaganda in China, is discredited in official quarters here, but it is learned that there is an increasing determination on the part of the government to call Russia to book if definite proof can be found to connect the Soviet Government and the anti-British campaign in China. One of the chief difficulties is to establish beyond a shadow of doubt this connection, because so many Soviet propagandists work in such a way that the Soviet disavows them whenever they are caught. The government has plenty of evidence, however, but it wants such evidence as it could put before the world as justification if relations with Russia were broken off.

Wheat Pool Crop Year For 1924 Ends July 15

Regina. — The Saskatchewan Wheat Pool will close its 1924 crop year July 15, the date set for making the cut-off. It is announced by A. J. McPhail, president. The Alberta and Manitoba pools have set the same date for making their cut-off. "Any grain received at the terminals after July 15 will be treated as though it were part of the 1925 crop," added Mr. McPhail, and an initial payment of one dollar will be made until the final payment for the 1924 crop has been definitely decided later in the season."

To Reconstruct Santa Barbara

City To Be Re-Built Along Lines Of Spanish Architecture
Santa Barbara, Calif.—Santa Barbara business men will reconstruct the earthquake-torn area of the city along lines of Spanish architecture, according to a decision reached while the city was recovering from the effects of the blow of the earthquake. In restoring the city in Spanish architecture, the business men will follow the recommendations of the Santa Barbara Art Society.

Bolshevism In China

The New Canton Government Has Red Tendencies
Canton.—The new government for southern China was formed here by the military which recently captured Canton.

The new civil government, Wu Hsiang-shan, known for his Bolshevik tendencies. All foreign consuls here, except the British and French, were invited to a reception held by the new government. There is a general feeling here that further trouble is in the offing.

Grain Growers Disapprove Regina, Sask.—Disapproval of the action of certain western Canadian farmers in supporting a change in the revised Canada Grain Act taking away from the farmers the right of determining where their grain should be stored until it is sold, was expressed in a resolution unanimously passed by the executive of the Saskatchewan Grain Growers' Association in session here.

Movie Adonis Gets Black Eye
Regina, Sask.—A popular movie star, Adonis, who was in Regina, was hit on the head by a brick thrown by a crowd of fans during a performance at the Regina Theatre.

Volcano Rocks Colombia
Bogota, Colombia.—Volcanic eruption of the volcano of Galeras, near Pasto, began with great flames issuing from the crater and large quantities of rocks and ashes covering the surrounding country. Communication with the towns of La Florida and Sonsona is cut off, and it is expected they have been destroyed.

Placer Strike Made Dawson.—A rich placer strike is reported from the headwaters of the Pelly River, 22,000 worth of gold dust having been brought in by Indians.

Another Imperial Parley Suggested

But British Premier Doubtful As To Its Usefulness Just Now
London.—A C. H. Dixon, member of the House of Commons, has suggested in view of the danger to the Empire owing to the state of trade in Britain, that representatives of dominions should be called together to formulate Empire schemes to develop the resources of the dominions and finding work for the unemployed.

The Oldest Newspaper

Claims Halifax Chronicle Is Canada's First Newspaper
Halifax, N.S.—Championing for Halifax the distinction of having Canada's oldest newspaper, the Halifax Chronicle, in its 1925 centennial edition states: "At 172 Grafton Street stands the building in which was printed Canada's pioneer newspaper, 'The Halifax Chronicle'—today 'The Nova Scotia Herald'—the oldest paper being published in North America. The paper has been published continuously for 172 years and is now the official publication of the Nova Scotia Government."

United Public Opinion

Canadians Can Alter the Whole National Situation Says
Victoria, B.C.—If Canadians would meet on common ground to compose the differences they could, it was said by the whole national situation declared Lord Blyth, governor-general of Canada, who is making a tour of the western provinces, during the course of an address before the Canadian Club here.

There was a united public opinion," stated Lord Blyth, "something would happen. If the east and west could get together in a nice way, if the French and English people could talk differences over in friendly fashion, they could produce a harmony might be found in the great public abilities." A united public opinion might take us a long, long way to freedom from our differences from a national point of view."

Unusual Honor For Canadian

Chief Justice Anglin Made Member of Inner Temple
Ottawa.—Mr. Hon. F. A. Anglin, chief justice of Canada, is announced from London, England, that he has been elected a member of the Inner Temple. The chief justice is the first Canadian to receive the honor. The members of this inner circle are restricted to four and the honor is an unusual one. The chief justice is the only Canadian to have been elected, including the late Sir Wilfrid Laurier. Mr. Hon. L. P. Duff, of the Supreme Court of Canada, is an honorary member of Gray's Inn.

A Great Canadian Ideal

Must Think of Canada As a Whole, says Baron Byng
Vancouver.—An appeal for "a great Canadian ideal" and a "United Kingdom of Canada" was the keynote sounded by Baron Byng of Vinny in his address here before the Canadian Club.

"We must think of Canada as a whole," said his excellency. "The boys at Vinny represented Canada as a whole. It was then that all of the provinces walked up the hill as one, all with the same ideal before them, and with the same idea in mind."

The Inter-Allied Debt Question Is Thrust Still Further To The Fore

Paris.—The French Government is reported to have made an announcement on the United States debt question within a few days. It will probably be limited to scarcely more than naming the nation to go to Washington. French debt negotiations with the United States will be kept strictly apart from those with Great Britain.

The inter-allied debt question has just been thrust still further to the fore by the receipt from London of a new memorandum suggesting that France make an offer for settlement of her debt to Great Britain even if it is a provisional one.

The memorandum, signed by Sir. Hon. Austen Chamberlain, the foreign secretary, takes cognizance of the French plan in connection with her United States debt by stating that

Great Britain has no desire to interfere with negotiation which France might initiate with other creditor powers.

Mr. Chamberlain feels the occasion, however, to state the principle that Great Britain feels that she is entitled to treatment on an equal footing—that is, should France sign an agreement for payment of part of her debt to the United States, the British would expect a proportionate reimbursement of the same due them.

The British memorandum is being studied by Foreign Minister Briand and Finance Minister Cillieux, who are expected to give a reply to the cabinet to initiate negotiations for settlement of the inter-allied debts.

W. N. U. 1584

Canada's Vast Northland

Immense Area Has Been Mapped and Chartered by Government

An interesting locality, Canada's country "North of 55," where the bison range and where the Walrus buffalo have gone to graze in peace, has been recently mapped and chartered by the topographical survey, department of the interior, Ottawa.

The map is compiled from northern control and exploratory surveys by topographical survey parties during the years 1902 to 1924, and includes the area from which the headwaters of the Lockhart, Coppermine, Tuck and Hanbury Rivers take their rise. There are two inset maps on the large sheet, one showing, on a small scale, the location of the area mapped with respect to Great Slave Lake, and the other showing, on a larger scale, the entire route from about Slave Lake to Arctur Lake—the lengths of each portage being indicated in yards.

An interesting feature of the map is the location of the last of the great Thelon overland portage, the survey or found scrub spruce, a foot and a half high, in the middle of the portage and tamarac attained good development, but in places exposed to the northeast wind only the spruce grew sparingly and tamarac was scarce. In its small size carrying rings shown in age of 200 years and more.

The stone fragment of a mammoth skull in 1932 by the explorer, Sir George Mack, as a part of Fort Reliance still stand at the mouth of the Lockhart River. The explorer describes the so-called Barren Lands as beautiful rolling hills in August, with their rolling hills in August, upon which the local Indians live. Waterpower sources abound, the region's rocks look rich, and there is wealth in iron.

Banks On Ocean Liners

Every conceivable kind of currency kept in stock

It may not be generally known that banks are now operated on many of the first-class liners plying between Atlantic, between Great Britain and ports on this continent.

How elaborate the business is, will be understood when it is known that, very often as many as twenty different nationalities are found on board a liner. Especially when travelling for the first time, many passengers begin a long voyage without any money, whatever the amount, and the bank always arrives in regard to petty cash.

When Chalmers present their peculiar money for changing into local currency, the bank officers are not dismayed, for almost every conceivable kind of currency is kept in stock. The money-changing, which is the main business of these floating banks, is executed at the rates of exchange which are received daily by wireless from New York.

Century-Old Ship Still in Service

Trading between Southampton and Isle of Wight Since 1801

A ship that is 124 years old is still active service in the world's shipping. She is the little chit Bee, which trades between Southampton and Newport in the Isle of Wight, and has made nearly 300,000 crossings of the Solent since 1801.

She is one of the few ships remaining in the world from whose decks men saw the Victory at sea with Nelson on board, and was once commanded for forty-eight years by the same captain.

She has been on the same route the whole of her existence, and has carried more than half a million tons of cargo between the mainland and the Isle of Wight, covering more than half a million miles, although the distance between her two ports is only eighteen miles. Three younger sisters of the Bee have been on the route for fifty years.

German War Memorial

At the close of a fervid speech, as part of the celebration in commemoration of Germany's possession of the Rhinefeld for one thousand years, Burgomaster Adenauer announced that Germany soon would have a new soldier shrine. He said the unknown soldier would be buried in the Cologne Cathedral, the tomb to serve as a German national war memorial.

Double Celebration

Mr. and Mrs. Andrew Rice and Mr. and Mrs. Benjamin Rice, of Milbury, Mass., were married at a double wedding ceremony 62 years ago. They recently celebrated the celebration of the anniversary.

Men are creatures, says a woman. She cut down great trees, made room for a city and then plant little saplings to beautify it.

Found Strange Caterpillars

Author Tells of Queer Insects That March in Procession

Among the strangest insects in the world are those caterpillars living in the tropics, who, when they go for a walk by their own trail to show the way home.

Mr. Cherry Kearton, in his book, "The Strange Insects of the World," tells of a caterpillar that he saw on a party of caterpillars that march out in procession, the way home, a perpetual follower-leader. Wherever they go they leave a silken ribbon behind them, along which they usually return home.

On two occasions Mr. Kearton found a couple of processions not far apart, about to cross the road. He carefully photographed the two processions into each other. A little confusion ensued. Then one lot waited for the other, and both parties formed up, making one long line, and marched off together, all going back to one nest.

Another experiment consisted of rolling a caterpillar away from the middle of the procession. When this was done the leader suddenly stopped and followed him the whole line from end to end.

The member who had been interfered with, started to make his way back, but the caterpillar which had been left open, the caravan meanwhile waiting. One he got into place, and made contact to follow, the procession started off, just as if some word of command had been given.

Fulfilled Old Martial Custom

Maharajah of India Not Allowed to Die in Bed

Some of the old customs of the east are very peculiar, as the following story, from a Calcutta, India, paper, will amply show.

In the centre of a richly furnished apartment lay the Maharajah of Pipla, apparently ill. Round him, in a circle, stood the state physicians. At a solemn guard, murmuring strange incantations, and burning an aromatic incense, they stood around him.

The British resident surgeon examined him and pronounced his verdict. "His illness has five minutes to live," he said.

"Will you," asked an aged courtier, "please raise your hand a minute before you die?" The resident surgeon, with sensitive fingers feeling the dying ruler's pulse waited for the last spasmodic breath.

Suddenly the surgeon raised his arm, and at the same time instant death came.

The door flew open, a motley throng surged into the room, the dying Maharajah of his bed, lifted the Maharajah of his bed, rushed him through the open door on a stretcher, and deposited him with a bump on the landing stage of the courtyard.

The Maharajah died, but the old, long martial custom had been fulfilled. He did not die in his bed.

Achievements of the Age

Many Old People Are Doing Very Remarkable Things

The age of the last Viking recognition, and people are straying away from the opinion that this is purely a thing of the past. Every day morning an old man of ninety-five leaves his suburban home for London city, where he is the manager of a large business. He is probably a record, but there are many other old folk whose activities are remarkable.

A Russian painter who died not long ago at the age of ninety-three did not begin as an artist until he had passed her seventeenth birthday. In the following twenty-three years she achieved distinction as a painter of religious subjects.

There are many old people living up with the youngsters. An elderly woman began swimming when she had passed her sixteenth birthday, and still swims every day. But the price for athletic old age must surely go to two inmates of an institution for the aged. They are seventy-seven and eighty respectively—and have taken up boxing. Their ambition is to give an exhibition bout for charity.

A Remarkable Gift

Dr. Marion Vaughan, now a London medical officer, must justly claim to have had the offer of the most remarkable gift ever made to a woman, for after she had successfully treated a colony of natives for bubonic plague, a tall stout Indian, who had prepared to return home, and as a token of gratitude the villagers deputed him to present a gift to her. This was found to be in the form of 28 black bullocks.

Columbus Was Real Discoverer

Only One Who Opened America to Old World

An attempt has recently been made by historical researchers to question the title of Christopher Columbus as the true discoverer of America. Writers have been analyzing some old records that have come to light in France, and they allege that Columbus did not sail from Cadiz with the knowledge of the "new world to the west, but with actual information that a rich land lay over there. It is well known that numerous other European had made voyages to the Americas, but Columbus was the first to establish a permanent settlement and to settle and lead before Columbus landed sail, and that other adventures probably had reached these shores before he came. But it has not until now been contended that Columbus was not in truth a "discoverer," but that he was simply following a tip and that he knew what he was going to find.

It will be impossible to rob Christopher Columbus of his title. However many adventures may have preceded his, these adventures, however frequently contended, had been effected in Western Europe and the Americas, as they came to be known, the fact remains that no great continent was the New World opened to the world. If earlier traders came they departed never to return, or they kept the secret of western riches jealously. It was Columbus, and he alone, whose voyages effected the settlement and development of America.

—Washington Evening Star.

Taximeters Used In Old Days

Instrument Was Invented to Relieve Professional Pacers

Modern research has disclosed that the curious device known as the taximeter was invented to relieve the professional pacers of the Acropolis in the days of Pericles were fitted with ingenious and highly ingenious taximeters.

In the days of Pericles, the distances were measured by professional pacers called bematists, who followed the king on campaign, and made progressions, but with the introduction of horses and chariots the bematists lost in that hot and dusty land became an arduous and unenviable task. The taximeter of those days was, it is said, invented out of sympathy for the king, and was used to measure the distance of his journeys. It was a little instrument, carried by a slave, and was used to measure the distance of his journeys. It was a little instrument, carried by a slave, and was used to measure the distance of his journeys.

The door flew open, a motley throng surged into the room, the dying Maharajah of his bed, lifted the Maharajah of his bed, rushed him through the open door on a stretcher, and deposited him with a bump on the landing stage of the courtyard.

The Maharajah died, but the old, long martial custom had been fulfilled. He did not die in his bed.

Emperor's Horses Sold

Keeping Promise To Give For Them Too Much For Price

When the late Emperor Charles was banished, Prince Francis Esterhazy, in a moment of anger, promised to sell and for the Emperor's horses "must such time as the Hapsburgs should want them again."

The undertaking brought to the Prince's aid. Every day morning an old man of ninety-five leaves his suburban home for London city, where he is the manager of a large business. He is probably a record, but there are many other old folk whose activities are remarkable.

A Russian painter who died not long ago at the age of ninety-three did not begin as an artist until he had passed her seventeenth birthday. In the following twenty-three years she achieved distinction as a painter of religious subjects.

There are many old people living up with the youngsters. An elderly woman began swimming when she had passed her sixteenth birthday, and still swims every day. Want Wolf Bounty Cancelled

Northern Trappers Say Foxes Depend On Wolves For Food

The old question of man's interference with nature has been raised anew by the persistence with which the wolf of the far north is being hunted as a result of the increase in the government bounty from \$20 to \$40.

The trapper, coming down from the north caribou in his pack a few wolf pelts. For the past year, the government has had a party of four wolfcatchers at work across the north plains, trapping eastward from Great Slave Lake.

This season, it is estimated, two or three hundred wolf pelts will be surrendered to the government, from the territory north of Edmonton.

The trappers themselves have raised the question whether it is advisable for this trapping of wolves to continue. They are generally in agreement that it all levels down to the fact that the adjustment which nature sets up between the denizens of the wild, and in the case of the wolf, the balance swings between the wolf, the caribou and the man.

The fox is the real staidity of the trap. The wolf preys on the caribou. The fox largely is dependent on the wolf for its food, and after the wolf has his fill, the fox, like Jack-all, feeds on the remaining carcass. The trapper, in the meantime, is reduced by the destruction of the wolf, they are gradually chasing away the fox.

It is reported that the trappers of the north are considering the feasibility of petitioning Ottawa for the withdrawal of the wolf bounty entirely, for a period at least.

Islands In The Arctic

Several Reasons Why Canada Claims the Ownership

Hon. Charles Stewart, having said that all the islands in the Arctic north of the Dominion are claimed by Canada, the New York Times wanted to know on what this claim is based. The answer is that it is based on the fact that three things that constitute such a claim in international law, namely: discovery, proclamation and effective occupation.

If the New York Times will look up history it will find that British explorers have been coming into the Arctic and leaving the Union Jack there for more than a century, that the Canadian Mounted Police have been occupying the most northern of these islands for years, and that by the proclamation of the late Queen Victoria, Canada claimed the islands north of Canada more than 30 years ago.

Canada does not claim Wrangel Island because it has been claimed by the Russian coast and properly belongs to Russia. But by everything that properly constitutes ownership Canada may extend her right to the North Pole, and we shall not roll up one inch of it—Ottawa Journal.

Century-Old Buckingham Palace

Was Converted Into Royal Residence From a Private House

Among the many centennaries that occur this year one may possibly be overlooked—the rebuilding of Buckingham Palace as a royal residence. Just a hundred years ago the newspapers of the day announced that "with the centre renovated and with two magnificent wings designed by Sir John Lubbock on a large scale, the Palace is to be converted into a residence for the King."

Though the exterior of the palace has no claim to architectural beauty the interior is very handsome, and the rooms are richly decorated. The original house was the home of the Duke of Buckingham, who named it after himself when he built it in 1703.

Bread From Empire Flour

Bread, made from exclusively empire flour, one-third of which will be Canadian, will be placed on the British market in a few months. The wheat which is to be used will be grown in Western Australia and the remaining third will be divided between Canadian and English flour.

This empire bread will be delivered as in Canada and New Zealand, in sealed cartons. It will be sold at the standard prices for bread.

Storing Steam

A medal has been awarded by the Swedish Academy of Engineering Sciences to the inventor of a simple device which stores steam during the winter for use when larger quantities are needed.

New Use For Eiffel Tower

The French Government's need for additional revenue has induced it to grant a concession permitting an Australian wireless manufacturer to use the Eiffel Tower for an electric display advertisement.

Work That Withstands Time

Ancients Made Many Things Unknown To Modern World

The Romans were great builders and the mortar they used in the construction of their homes remains practically imperishable. Buildings are now standing in which the mortar is just as solid as it was 2,000 years ago. Roman mortar resists the ravages of time and climate in the most remarkable manner. Another closely guarded secret of the Romans was their method of making bronze. Some of their sword of bronze were as hard, and probably as sharp as ours of steel.

But even the Romans were excited in metal work by that ancient and mysterious people called the Aztecs, who lived in Mexico thousands of years ago. They possessed the secret of making virgin copper as hard as steel and capable of taking the finest edge. Scarcely anything would be more valuable today than unbreakable glass, and many attempts have been made to produce it as the ancients did. Gold tools were made of elastic glass in the time of the Aztecs. The Aztecs learned that some of the glass drinking vessels then in use were crystalline, just as spring as steel.

Tunes For Which Britons Stand

Three British National Anthems Audience To Be First

There are at present only four tunes, or pieces of music, at the first note of which every British soldier is bared in respect, although Scotsmen are agitating for a fifth. It goes without saying that the first is the National Anthem. Then for more than a century and a half it has been an unwritten rule at the performances of Handel's "Messiah" for the audience to rise to its feet at the first strains of "The Hallelujah Chorus" and remain standing till the end of the piece.

Another composition, "God Save the King," which everybody to their feet is, "The Dead March of the Regiment," which is played in the funeral of a British soldier, and "The British Grenadiers," which is played in the funeral of a British soldier. Since the inauguration of the two minutes' silence on Armistice Day, God, our help in ages past, has become the national hymn, and as it is played or sung immediately after the silence no one ever moves, or places his hat or lifts out of his place. The hymn is finished. Now the Scots with to have Burns' immortal "Scots Wha Hae" recognized as the Scottish National Anthem.

"Articulated Trains" Are New

Placing of Wheels Has Made Motion Much Smoother

We understand articulation when applied to speech, but the phrase "Articulated Trains" may not be so well understood. Up to the present locomotives have been connected by coupled, but not articulated. There has been constant effort, ever since the early days of railways, to combine the best of both methods in the making up of a train. The first passenger coaches were attached to one another by a simple chain and hook, but later the coupling ears have been much closer and more compact. The finely adjusted springbuffers between the coaches in close contact, and the train is now a single unit.

There is no room for the feeble minded. In the first of January the asylum harbored 7,555 lunatics, two months later the number had increased to 7,570, and it was announced that not only were all the institutions filled but crowded to capacity.

Getting Even

"But we've got fifteen minutes getting better," objected the passenger. "The meter says we've come 29 miles, and we've got the cash," snarled the taxi driver.

"All right," assented the passenger, paying the fare. "But you get ready to come with me for driving 30 miles an hour. I'm a speed cop."

Manitoba Good Roads

Work on market roads in various municipalities involved an expenditure of \$214,551 had been authorized by the Manitoba good roads board and approved by the minister of public works. The Manitoba Government's share of this expenditure is placed at \$148,648.

Have You Seen Canada?

Canadians Should View Their Own Country Before Going Abroad

Canada contains over 1,700,000 square miles of which over 2,600,000 square miles is land. How much of this area has you seen? This question is asked by the natural resources intelligence service of the department of the interior. Canada has all the attractions that any country could wish to see. There are quiet spots where those wanting a rest may find their heart's desire; there are rivers, lakes and the sea where the who delights to hear the whirr of the wheel may secure the finest game fish; throughout large portions of the country the canoe rovers beckon to those who would live in the open.

Many thousands of miles of the best of Niagara water are open to the tourist. Opportunity to tour Canada as never before. Untold millions of people have been poured out of the road travel have been made comfortable and pleasurable, and over these good roads each year thousands visit your view the country and recognize its beauty. There are rivers, lakes and the sea where the who delights to hear the whirr of the wheel may secure the finest game fish; throughout large portions of the country the canoe rovers beckon to those who would live in the open.

Determining Age Of Fish

Counting Growth Rings On Scales Is Absolutely Reliable

In January, 1912, several hundred fish of various species were taken from the waters of the State of New York. They were kept and nurtured in the best known methods of fish culture, principles of which are now being developed. It was found that the rings would be found in a projected place by every condition of weather, comfort and food that could be devised. In the last week of January, of the present year, making this longest-lived one twelve years of age, the University of Michigan made monthly studies of scales from these fishes over an interval of 30 days.

Zoo Food Bill Is Large

Tons Of Stork Consumed Costing About \$50,000 Annually

Worked out horses in London "are about the most expensive of the menagerie," says a London Zoo official. The menagerie made fat and sleek, then slaughtered and fed to the animals, the number of storks disposed of last year being 440. The warden consumed 40 tons of codfish, besides nearly 20 tons of herring. Other articles of food for the menagerie include 16,000 pounds of milk, 125 pounds of honey, 258 pounds of ants' eggs, 77 pounds of codfish, 150 pounds of codfish, 213,000 gallons, 345 gallons of fresh milk, the food bill for the year reaching \$50,000.

Serious Problem In Paris

Paris housing problem has become a serious that it has extended to the issue of asylum of the city. There is no room for the feeble minded. In the first of January the asylum harbored 7,555 lunatics, two months later the number had increased to 7,570, and it was announced that not only were all the institutions filled but crowded to capacity.

Getting Even

"But we've got fifteen minutes getting better," objected the passenger. "The meter says we've come 29 miles, and we've got the cash," snarled the taxi driver.

"All right," assented the passenger, paying the fare. "But you get ready to come with me for driving 30 miles an hour. I'm a speed cop."

As To Flags

Let us stick to the Union Jack. When we decide to separate from the Empire, it will be time enough to make a Canadian flag. As long as we make a Canadian flag—its advocates should remember—we must preserve the Union Jack as the flag of the Mother Country to do the defending—Halifax Herald.

Referred back—Alaskan Hospital, two accounts of \$0 each for correction.

Council adjourned at 6 p.m. to meet again at Orange Hall, NW 10 26-29 w. 3 at 10 a.m.

Advice has been received from the Dept. of Public Health that the vote on the Batonia Union Hospital will be taken July 22, in twps. 24 25 26 and 27 in rg. 27.

The effect of this if carried, will be that the present municipal bylaw will operate just as it does now, but that at Batonia the municipalities will own their building instead of owning rented one, and such necessities as running water and a proper sanitary system can be installed. The Govt. grant of 50 cents per day per patient treated should approximately meet the cost of the debenture payments which will be required to pay for the building. A two-thirds majority of those voting is required to carry the proposed scheme.

C. Evans Wargent, Sec. Treas.

NOTICE OF SALE

NOTICE is hereby given under Section 46 of the **Provincial Act** (Imp. 1914) that One light bay gelding, white face, white hind feet, branded on left shoulder, was impounded in the pound kept by W. Gibson, at Acadia Valley, Alta., located on the S. 1/4, Sec. 16-26-2, w. of 4th, on the 29th day of June, 1925, and that the said animal was sold on the 9th day of July, 1925, to H. O. Whistler, of Acadia Valley, Alta.

And One brown mare, small stall in harness, branded on black face, weight 1100 pounds, dated 1 year old, no visible signs, was impounded in the pound kept by W. Gibson, at Acadia Valley, Alta., located on the S. 1/4, Sec. 16-26-2, w. of 4th, on the 29th day of June, 1925, and that the said animal was sold on the 10th day of July, 1925, to H. O. Whistler, of Acadia Valley, Alta.

And One brown mare, old, black legs, about 2 years old, no brand, was impounded in the pound kept by W. Gibson, at Acadia Valley, Alta., located on the S. 1/4, Sec. 16-26-2, w. of 4th, on the 29th day of June, 1925, and that the said animal was sold on the 10th day of July, 1925, to H. O. Whistler, of Acadia Valley, Alta.

And that the said animals may be redeemed by the owners on their behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the producer of said animal.

For information apply to the undersigned, CHAS. H. HANSEN, Secretary-Treasurer, Municipal District of Area No. 241, Post Office, Acadia Valley, Alta.

Some Factors Influencing The Contamination of Milk

While the sources of contamination of milk are understood in a general way, there is perhaps need of a more widespread knowledge of the various factors upon which the germ content of the milk as it leaves the stable depends.

With the object of determining more closely the relative effect of the various factors, a series of experiments extending over five months, was conducted at the Central Experimental Farm, Ottawa. In the test, the various sources of contamination were considered under a wide range of conditions, the various factors being divided for convenience into four classes, viz. care of the stable, care of the animals, care of the milker and care of the udders. By extending the test over a prolonged period, during which daily bacteriological tests of the milk were made of a large number of cows kept under as nearly identical conditions as possible, results were obtained which indicate different degrees to which various factors contribute to the contamination of the milk.

It was found possible, by the careful exercise of the ordinary sanitary precautions, to produce a milk of excellent quality without resorting to elaborate expensive methods. One of the points brought out was that the principal sources of contamination are represented by dirt and manure dropping into the pail during milking, and by improperly cleaned utensils. The contamination from the pail to indicate another source is relatively less important, even when considerable dirt is about.

The importance of the milk pail was clearly indicated, its state of cleanliness being of more concern than its form. While an open-top pail was found to result in an increased germ content of 200 per cent as compared with one with a small opening if the animals were neglected, yet when care was taken with the animals and the udder wiped before milking, very little extra contamination resulted from an uncovered pail. Of much more importance was the sanitary state of the pail. The tests brought out that this factor affected the contamination more than any other connected with the milking. Under clean milking conditions a change from a careful scouring, preferably with the use of steam, to a neglect in the care of the pails resulted in a greater in-

crease in the germ content than the neglect of any other single precaution, while on the other hand, where generally unsanitary conditions prevailed, a change to a proper treatment of the pails resulted in a bigger improvement than from any other single favourable change of operation.
